

Environment Policy

As a company leading the way toward a sustainable future, SK ecoplant recognizes the environment as a core value. To contribute to sustainable development through eco-friendly management practices across our business, SK ecoplant hereby declares the following Environment Policy:

1. We transparently disclose our environmental management performance and contribute to social development through active communication with stakeholders.
2. To ensure full compliance with domestic and international environmental laws and regulations, we establish and apply stricter in-house standards.
3. We minimize environmental risks by identifying, implementing, and promoting eco-friendly initiatives throughout all stages of our work.
4. In response to climate change, we encourage voluntary participation and practice by all employees in environmental management activities, take the lead in addressing fundamental environmental issues, and strengthen our global leadership.
5. We contribute to the Company's continuous growth and development through innovation and continuous advancement of environmental management.
